## Closed Sales

The number of sales transactions which closed during the month

**Economists' note:** Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend using the year-over-year percent changes rather than the absolute counts. Realtors® and their clients should also be wary of month-to-month comparisons of Closed Sales because of potential seasonal effects.

## New Pending Sales

The number of property listings that went from "Active" to "Pending" status during the month

**Economists' note:** Because of the typical length of time it takes for a sale to close, economists consider Pending Sales to be a decent indicator of potential future Closed Sales. It is important to bear in mind, however, that not all Pending Sales will be closed successfully. So, the effectiveness of Pending Sales as a future indicator of Closed Sales is susceptible to changes in market conditions such as the availability of financing for homebuyers and the inventory of distressed properties for sale.

## New Listings

The number of properties put onto the market during the month

**Economists' note:** In a recovering market, we expect that new listings will eventually rise as sellers raise their estimations of value. But this increase will take place only after the market has turned up, so New Listings are a *lagging* indicator of the health of the market. Also be aware of properties which have been withdrawn from the market and then relisted. These are not really New Listings.

## Median Sale Price

The median sale price reported for the month (i.e. 50% of sales were above and 50% of sales were below)

**Economists' note:** Median Sale Price is our preferred summary statistic for price activity because, unlike Average Sale Price, Median Sale Price is not sensitive to high sale prices for small numbers of homes that may not be characteristic of the market area.

Month	Median Sale Price	Percent Change Year-over-Year
September 2015	\$375,000	19.0%
August 2015	\$373,500	11.2%

Median Sale Price

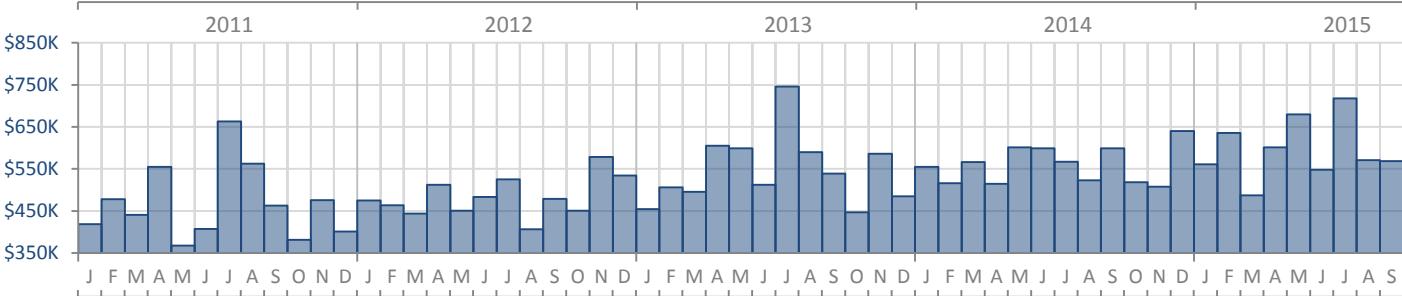

## Average Sale Price

The average sale price reported for the month (i.e. total sales in dollars divided by the number of sales)

**Economists' note:** As noted above, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Month	Average Sale Price	Percent Change Year-over-Year
September 2015	\$568,991	-5.0%

## Median Days on Market

The median number of days that properties sold during the month were on the market

**Economists' note:** Median Days on Market is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took *more* time to sell. We use the median rather than the average because the median is not particularly sensitive to sales of homes that took an unusually large amount of time to sell relative to the vast majority of homes in the market.

## Inventory (Active Listings)

The number of property listings active at the end of the month

**Economists' note:** There are a number of ways to calculate Inventory, so these numbers may not match up to others you see in your market. We calculate Inventory by counting the number of active listings on the last day of the month, and hold this number to compare with the same month the following year.

Month	Inventory	Percent Change Year-over-Year
September 2015	1,465	-6.1%
August 2015	1,465	-7.2%
July 2015	1,462	-4.6%
June 2015	1,425	-7.9%

February 2015	1,444	3.3%
January 2015	1,432	12.2%
December 2014	1,413	8.2%
November 2014	1,506	14.2%
October 2014	1,540	19.2%
September 2014	1,561	23.8%

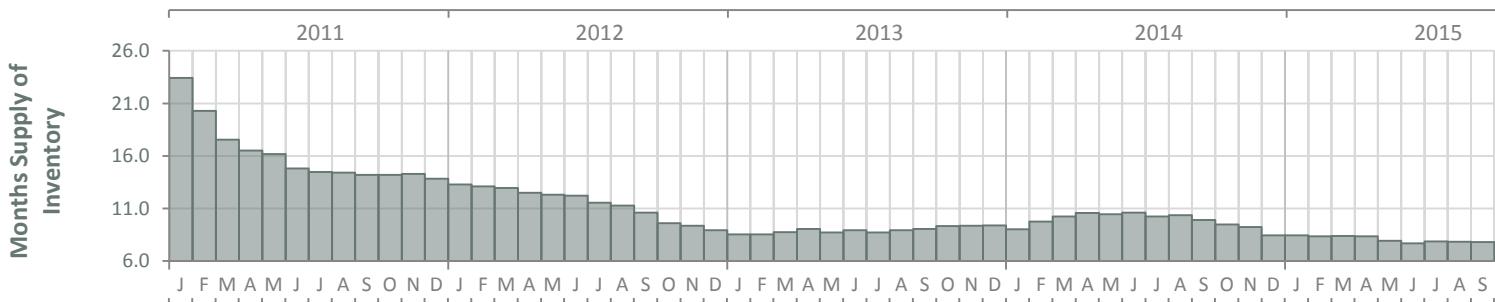

## Months Supply of Inventory

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

**Economists' note:** This is an indicator of the state of the market, whether it is a buyers' market or a sellers' market. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 Months of Inventory. Higher numbers indicate a buyers' market, lower numbers a sellers' market.

## Median Sale Price

The median sale price reported for the month (i.e. 50% of sales were above and 50% of sales were below)

**Economists' note:** Median Sale Price is our preferred summary statistic for price activity because, unlike Average Sale Price, Median Sale Price is not sensitive to high sale prices for small numbers of homes that may not be characteristic of the market area.

Month	Median Sale Price	Percent Change Year-over-Year
September 2015	\$335,000	15.5%
August 2015	\$323,000	7.7%
July 2015	\$319,750	10.5%
June 2015	\$318,000	12.6%
May 2015	\$331,000	-1.4%
April 2015	\$347,000	5.2%
March 2015	\$316,000	-11.6%
February 2015	\$322,000	16.2%
January 2015	\$256,000	-2.5%
December 2014	\$300,000	-3.2%
November 2014	\$285,000	4.6%
October 2014	\$253,000	-15.7%
September 2014	\$290,000	-9.4%

Median Sale Price

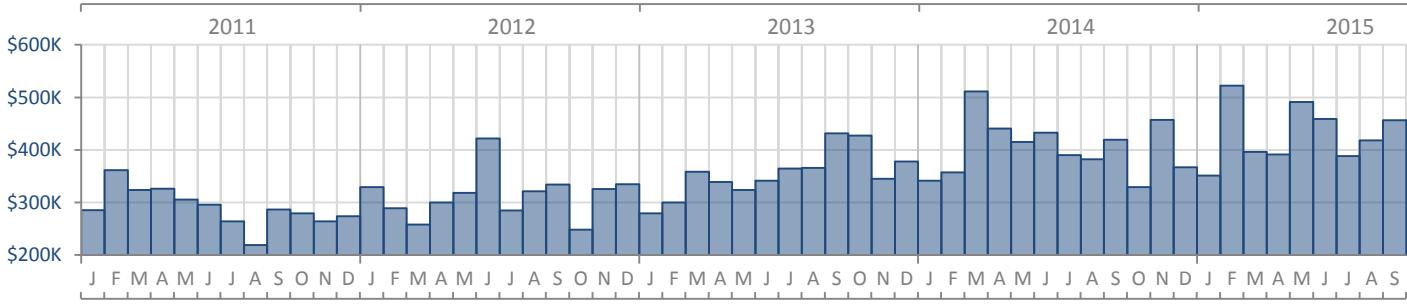

## Average Sale Price

The average sale price reported for the month (i.e. total sales in dollars divided by the number of sales)

**Economists' note:** As noted above, we prefer Median Sale Price over Average Sale Price as a summary statistic for home prices. However, Average Sale Price does have its uses—particularly when it is analyzed alongside the Median Sale Price. For one, the relative difference between the two statistics can provide some insight into the market for higher-end homes in an area.

Month	Average Sale Price	Percent Change Year-over-Year
September 2015	\$456,345	8.8%
August 2015	\$418,093	9.5%
July 2015	\$388,191	-0.5%
June 2015	\$458,784	6.1%
May 2015	\$491,386	18.4%
April 2015	\$391,302	-11.1%
March 2015	\$396,277	-22.5%
February 2015	\$522,407	46.1%
January 2015	\$351,195	2.9%
December 2014	\$367,120	-2.9%
November 2014	\$456,821	32.3%
October 2014	\$328,970	-23.0%

## Median Days on Market

The median number of days that properties sold during the month were on the market

**Economists' note:** Median Days on Market is the amount of time the "middle" property selling this month was on the market. That is, 50% of homes selling this month took *less* time to sell, and 50% of homes took *more* time to sell. We use the median rather than the average because the median is not particularly sensitive to sales of homes that took an unusually large amount of time to sell relative to the vast majority of homes in the market.

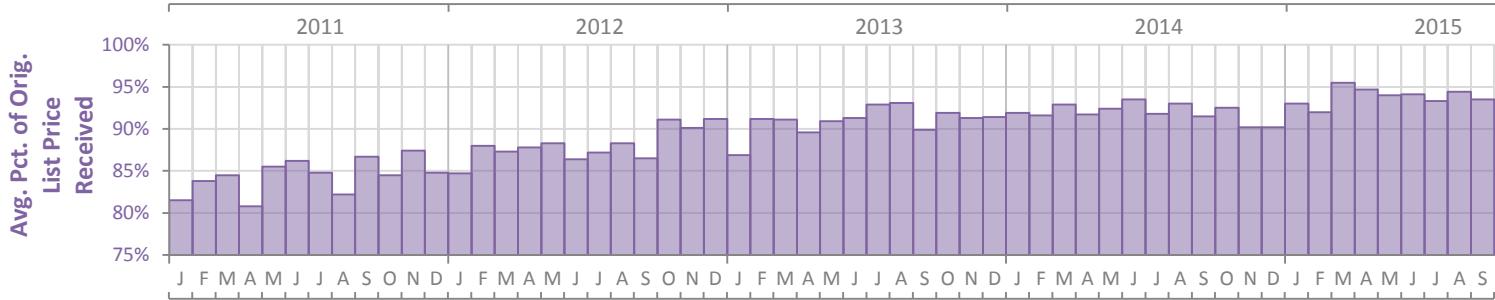

Month	Median Days on Market	Percent Change Year-over-Year
September 2015	139	69.5%
August 2015	75	-22.7%
July 2015	97	22.8%

## Inventory (Active Listings)

The number of property listings active at the end of the month

**Economists' note:** There are a number of ways to calculate Inventory, so these numbers may not match up to others you see in your market. We calculate Inventory by counting the number of active listings on the last day of the month, and hold this number to compare with the same month the following year.

Month	Inventory	Percent Change Year-over-Year
September 2015	640	-8.8%
August 2015	629	-12.9%

## Months Supply of Inventory

An estimate of the number of months it will take to deplete the current Inventory given recent sales rates

**Economists' note:** This is an indicator of the state of the market, whether it is a buyers' market or a sellers' market. The benchmark for a balanced market (favoring neither buyer nor seller) is 5.5 Months of Inventory. Higher numbers indicate a buyers' market, lower numbers a sellers' market.

Month	Months Supply	Percent Change Year-over-Year
September 2015	8.0	-21.3%
August 2015	8.0	-21.9%

## Closed Sales by Sale Price

The number of sales transactions which closed during the month

**Economists' note:** Closed Sales are one of the simplest—yet most important—indicators for the residential real estate market. When comparing Closed Sales across markets of different sizes, we recommend using the year-over-year percent changes rather than the absolute counts. Realtors® and their clients should also be wary of month-to-month comparisons of Closed Sales because of potential seasonal effects.

Sale Price	Closed Sales	Percent Change Year-over-Year
Less than \$50,000	0	N/A
\$50,000 - \$99,999	1	-50.0%
\$100,000 - \$149,999	3	-57.1%

## New Listings by Initial Listing Price

The number of properties put onto the market during the month

Initial Listing Price	New Listings	Percent Change Year-over-Year
Less than \$50,000	1	0.0%
\$50,000 - \$99,999	1	0.0%
\$100,000 - \$149,999	5	-37.5%
\$150,000 - \$199,999	11	57.1%
\$200,000 - \$249,999	7	-12.5%
\$250,000 - \$299,999	15	50.0%
\$300,000 - \$399,999	16	-38.5%
\$400,000 - \$599,999	18	38.5%
\$600,000 - \$999,999	7	16.7%
\$1,000,000 or more	12	0.0%

**Economists' note:** In a recovering market, we expect that new listings will eventually rise as sellers raise their estimations of value. But this increase will take place only after the market has turned up, so New Listings are a lagging indicator of the health of the market. Also be aware of properties which have been withdrawn from the market and then relisted. These are not really New Listings.

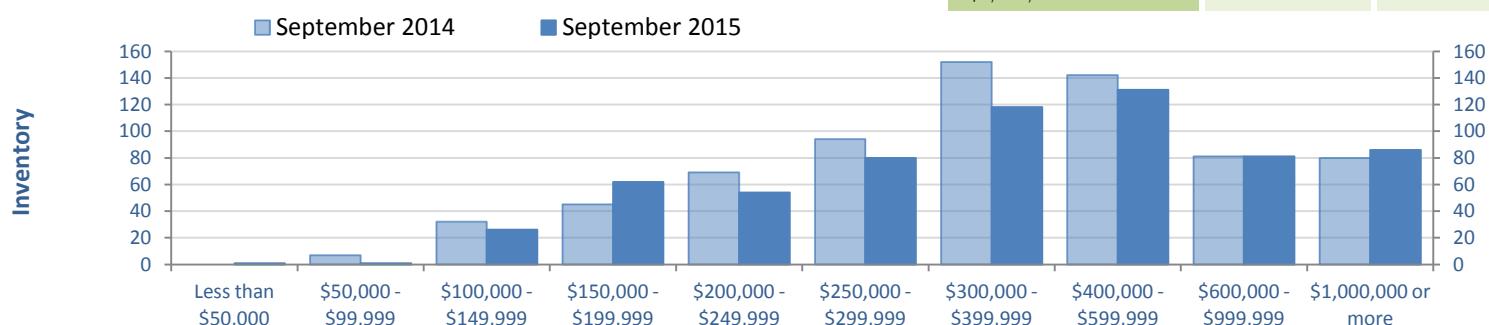

## Inventory by Current Listing Price
